

Application for Micro-loan with Sekepe

Our desire is to work with Christian ministries and organizations that work among the World's poor. The loans Sekepe makes are given directly to these ministries and organizations who in turn lend them to those in need of capital. The loans and interest are managed and paid directly to the ministries on the ground and not Sekepe. Once the loans are repaid, Sekepe would still like to work together with how the money can be reinvested into future loans helping others.
